

Biomarker Discovery & Validation Services

'Choose Us & expedite your drug or diagnostic product development'

QUALITY IS ASSURED

Promarker® Platform:

Proprietary platform for protein biomarker discovery, strengthened by validation using absolute quantitation of proteins

Uses high resolution and ultrasensitive mass spectrometers, operated by highly experienced mass-spectrometry experts

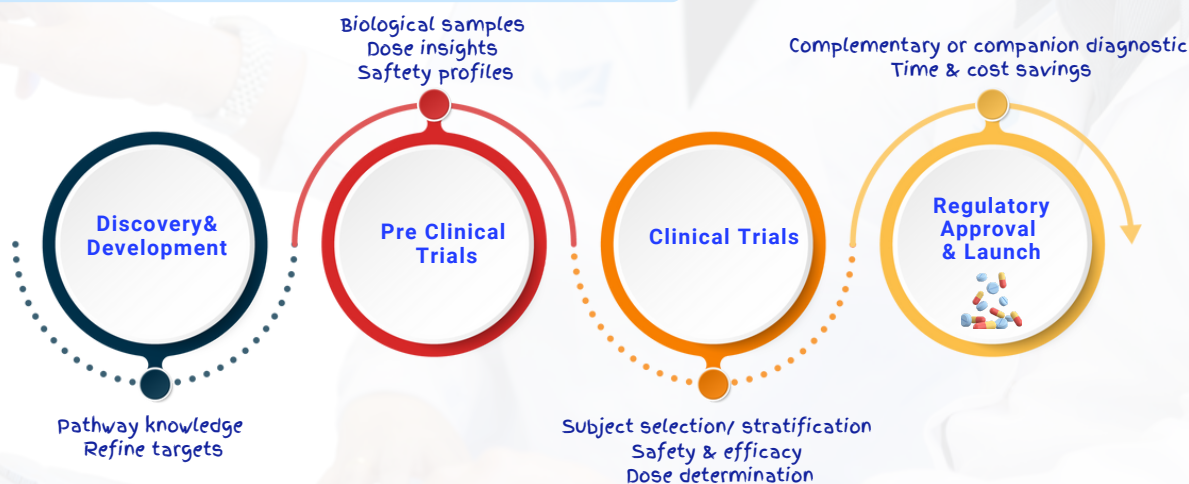

De novo biomarker discovery approach, characterized by minimal sample requirements and applicable across species

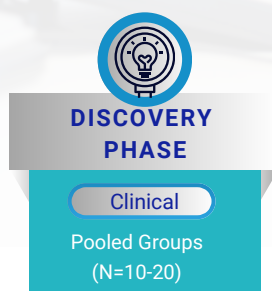

Success with multiple disease cohorts - including Diabetic Kidney Disease, Esophageal Cancer & Endometriosis

UTILITY OF PROTEIN BIOMARKERS IN DRUG DEVELOPMENT PATHWAY:

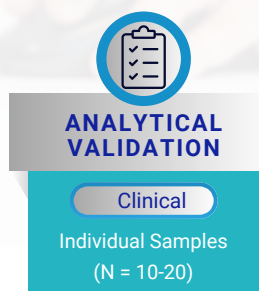

PROMARKER™ PLATFORM STUDY DESIGN:

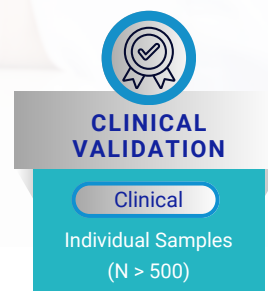

- Triplicate analysis

1 MONTH

- Assay Development
- Targeted Mass Spectrometry
- Statistical Evaluation

1 MONTH

- Assay Optimisation
- Targeted Mass Spectrometry
- Statistical Validation

3 MONTHS
