Exhibitor booth #2226

PI Wins Export Award

Proteomics International was acknowledged for its contribution to the Western Australian Healthcare and Biotechnology Industry.

This award recognises PI's world-leading proteomics expertise and services. It also showcases PI as a key player in Asia and emerging biosimilar markets with global links in the field of proteomics. [Media/ASX release](#)

US Patent Granted for PromarkerD Diagnostic Test

Proteomics International has been granted a US patent for PromarkerD – a ground-breaking test for early diagnosis of diabetic kidney disease (DKD). Grant of the patent represents a critical milestone in the development and commercialisation pathway for the test in USA – the world's largest health care market. [Media/ASX release](#)

Finalist in Innovator of the Year Awards

Proteomics International was a finalist in the Emerging Innovation Category for [PromarkerD and its innovative biomarker discovery platform](#).

The award acknowledges Western Australian innovators who have developed an outstanding product, technology or service. [Media statement](#)

Biosimilars Case Study for Insulin Family Released

Proteomics International, is a globally recognised and trusted company for demonstrating biosimilarity for regulatory approvals.

PI has released a case study for human insulin and its two analogues which highlights physiochemical evaluation assays for comparability testing of a range of biosimilars in the insulin family, including NovoRapid, Humulin and Lantus. [Media/ASX release](#)
