

Important Information please read carefully!

How to send samples for analysis to Proteomics International in Australia from other countries.

1. Print the Australian Quarantine form “**2018-Permit_Biological-products.pdf**” (two pages) and attach this document to the **outside** of your samples package in a plastic bag.
2. Cut the following declaration and paste into a document on **your institutional/company letterhead**, sign the declaration and attach this document to the **outside** of samples package in the same plastic bag:

Attention: Australian Quarantine Inspection Service
Declaration

I, _____ (name), of _____ Company/Institution) declare that the contents of this package originating from _____ (country) contains only proteins or peptides from _____ (organism [common name] /synthetic) for in vitro laboratory studies only and complies with the attached AQIS permit number IP0001964345. The samples have no commercial value.

Signed ----- Dated -----

It is important that these **two** documents must be attached to the **OUTSIDE OF THE PACKAGE** and clearly marked “**Attention Quarantine**” and be **CLEARLY** visible. If this is not done, the samples will automatically be retained for inspection and a fee charged.

On occasions an inspection fee is charged on imported samples. If this fee is incurred, it will be passed on to the client.

Delivery addresses:

Proteomics International
Harry Perkins Institute of Medical Research
QQ Block, QEII Medical Centre
6 Verdun St
Nedlands, WA 6008
Australia
