

Pharmacokinetic Testing

ANALYTICAL EXPERTISE

- 16 years of experience
- World leading scientists
- Comprehensive structural & functional characterisation
- Proven track record in regulatory approvals
- Quality management systems for service provision

PHARMACOKINETIC TESTING

- Targeted mass spectrometry
- Accuracy & precision
- De novo design
- Rapid assay implementation
- Quality accredited

COMPANION DIAGNOSTICS

- Proprietary Promarker™ platform for biomarker discovery & validation
- Biomarkers to improve drug development process
- Patient stratification
- Monitor safety & effect of a therapy
- Save time & cost in clinical trials

CAPABILITIES & KEY SERVICES

- World's first ISO 17025 laboratory accreditation for quality proteomics services
- Operates in accordance with the OECD Principles of Good Laboratory Practice (GLP)
- Leading mass spectrometry technology (LC MS/MS) for sensitivity and throughput
- Automated sample preparation for rapid and reliable turnaround times
- Hundreds of targeted mass spectrometry assays developed
- Sample storage facilities
- Phoenix® WinNonlin® software
- State-of-the art facilities at the Harry Perkins Institute of Medical Research in Western Australia
