

## Biostatistician

**Proteomics International** is an ASX listed medical technology company at the forefront of predictive diagnostics and bio-analytical services. The company specialises in the area of proteomics – the industrial scale study of the structure and function of proteins. It received the world's first ISO 17025 laboratory accreditation for proteomics services, and operates from state-of-the-art facilities, located on Perth's QEII Medical Campus.

### Key Responsibilities

- Perform statistical analyses and data simulations
- Prepare analysis reports
- Ensure quality of statistical data and reports generated
- Provide statistical advice on study design, project planning and interpretation

### Qualifications, Experience and Skills

- Tertiary qualification in statistics, biostatistics or close equivalent
- Experience in statistical analysis, interpretation and presentation of data (descriptive, data handling, complex modelling)
- Working knowledge of Microsoft Excel and SPSS (or other statistical packages)
- Excellent attention to detail
- Ability to clearly communicate statistical concepts to non-statisticians
- Interact with project managers and attend client meetings

### Desirable

- Proteomics data analysis (e.g. Analyst, Mascot, Protein Pilot, Skyline, Mass Hunter)
- Experience in clinical research
- QC/QA familiarity

High energy applicants who can multi-task and handle a fast-pace, dynamic work environment. Good communication skills, efficient time management skills, initiative and problem-solving skills are essential. We require a motivated Biostatistician with the ability to work within a team or on their own.

### Opportunities and Benefits

- Supportive work environment
- Competitive salary (commensurate with experience)
- Career growth and development opportunities
- State-of-the-art facilities
- Great location

The positions are being offered for full time or part time, with flexible hours available. The applicant must have the right to work in Australia.
